

Keith Ewing, CPA
Manager, Volume Decrease Adjustment

810.750.6822 Ext. 166
kewing@TheRybarGroup.com

As Manager of our Volume Decrease Adjustment team, Keith has over twelve years of healthcare regulatory reimbursement and payment experience. Through his work for one of the Medicare Administrative Contractors (MAC), Keith offers experience with financial and governmental reimbursement audits for healthcare organizations, non-profit organizations and government entities. This knowledge provides our clients with a current understanding as to what the auditors are requesting and how providers can work to optimize their reimbursement while meeting the regulatory requirements.

During his work at the MAC, Keith conducted extensive audits of the Medicare cost reports, ensuring Medicare reimbursement was fairly stated by reconciling reported amounts to external documentation and investigating any detected variances. He worked with providers on to evaluate their internal controls, providing guidance on any variances identified. His ability to maintain open communication and manage multiple projects at one time ensured clients' needs were met and led to the development of strong working relationships with provider clients.

Currently, Keith works with hospitals nationwide, focused on the opportunities associated with the Volume Decrease Adjustment regulations and on identifying improved reimbursement opportunities for our clients. His innovative problem-solving capabilities and the ability to link business strategies to successful outcomes is invaluable as he supports clients through the appeal process.

Keith received his Bachelor of Science in Accounting from Florida State University. He is a member of the Florida Chapter of Healthcare Financial Management Association.
